❖ Title: Chatting Application Project

Description: Designed and built the user interface using React and HTML, styled with Tailwind CSS to ensure a responsive and modern look. Managed application state efficiently with Redux, providing a seamless user experience.

Feature Implement: Integrated Firebase for backend services, including real-time database, authentication, and cloud storage. Implemented key features such as registration and login, friend requests, user lists, real-time chatting, and profile uploads.

User Interaction and Data Management: Enabled user authentication and friend management through Firebase Authentication and Firestore. Developed user profile functionalities including profile picture uploads and real-time updates. Ensured real-time communication and data synchronization for chatting features using Firebase.
